Bluefish444 adds more features and Edit-While-Record updates to IngeSTore *Updated codecs, Edit-While-Record, and RESTful API in IngeSTore version 1.1.2*

North Melbourne, Australia, August 6, 2019 – [Bluefish444](#), manufacturer of the professional video industry's highest-quality uncompressed UltraHD SDI, ASI, Video Over IP & HDMI I/O cards and mini converters, has released [IngeSTore](#) version 1.1.2. This [free update](#) of IngeSTore adds support for new [codecs](#), [Edit-While-Record](#) workflows and a REST API.

Bluefish444 have developed [IngeSTore software](#) as a complementary multi-channel ingest tool enabling [Bluefish444 hardware](#) to [capture](#) multiple independent format SDI sources simultaneously.

In IngeSTore 1.1.2, Bluefish444 has expanded codec support to include the [popular formats](#) OP1A MPEG-2 and DNxHD within the [BlueCodecPack licence](#). [Edit-While-Record](#) workflows are supported through both industry standard growing files and through Bluefish444's BlueRT plug-in for [Adobe® Premiere® Pro](#) and [Avid® Media Composer®](#). BlueRT allows Adobe and Avid NLE's to access media files as they are still being recorded by IngeSTore multi-channel capture software, increasing production efficiency via immediate access to recorded media during live workflows.

The IngeSTore REST API provides access to all the features of IngeSTore software from a remote networked device using an easy to use JSON interface. The API supports remote control of IngeSTore over IP networks and the customisation of functionality, and offering for the first time, the custom integration potential of IngeSTore systems.

"Our customers have been providing great feedback on the IngeSTore solutions and this update provides a number of significant improvements and features," comments Tom Lithgow, product manager at Bluefish444. "The REST API, codec updates and Edit-While-Record workflows provide a great base for IngeSTore integrations, and has laid the groundwork for Bluefish444 to provide further significant updates soon."

[IngeSTore](#) version 1.1.2 is [now available for download](#) from the Bluefish444 website at bluefish444.com/support/downloads/details/4/ingestore-software.html. Bluefish444 will be demonstrating the latest version of IngeSTore at [IBC Show 2019](#) on stand [7.B44](#), or find out more at bluefish444.com/ingestore.

About Bluefish444:

Bluefish444 is the manufacturer of the industry's highest-quality uncompressed KRONOS and Epoch 4K/UHD, 12G/3G, HD/SD SDI, ASI, Video Over IP & HDMI I/O cards and Synapse mini converters.

Bluefish444 is The Professionals' Choice for users and 3rd-party manufacturers alike, enabling multiple capture and playout workflow possibilities for corporate, house of worship, live event, display, presentation, interactive media and more. A reliable, high-quality brand that brings with it broadcast, feature film, & post-production pedigree. Bluefish444 hardware has integrations with Adobe, Avid, Unity, Unreal Engine, CasparCG, and partners with Vizrt, Brainstorm, ClassX, NewTek NDI and many more.

The IngeSTore multi-channel capture application developed by Bluefish444, allows efficient recording of SDI, HDMI, and 2110/2022 sources. Bluefish444's free cross-platform SDK is supported on Microsoft

Windows, Apple macOS, and Linux operating systems, allowing low-level integration of Bluefish444 IO with custom applications. Includes 3rd-party API support with DirectShow, V4L2, ASIO, Medialooks, NVIDIA CUDA, GPUDirect, and AMD DirectGMA.
